PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications using the MERN stack, React.js, Redux, and REST APIs. Developed projects including an ed-tech platform with authentication, payments, and cloud media management, as well as an AI-powered travel itinerary application integrated with the Google Gemini API. Skilled in responsive UI development, API integration, and asynchronous programming. MCA graduate (CGPA: 8.15) from University of Mumbai, eager to contribute to innovative software development teams.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, Redux, HTML5, CSS3, Tailwind CSS
Core Concepts: Responsive Design, REST API Integration, State Management, Component-Based Architecture, Async Workflows
Backend: Node.js, Express.js, MongoDB, MySQL, Socket.IO, JWT Authentication
Tools & Platforms: Git, GitHub, Postman, Webpack, Vite, Vercel, Redis

PROJECTS

Study Notion — Ed-Tech Platform

GitHub | Live

React.js, Redux, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a full-featured ed-tech platform for creating, consuming, and rating educational content, with role-based access for students, instructors, and admins.
- Designed an intuitive UI using React, Tailwind CSS, and shadcn/UI, improving user engagement by 25% based on session metrics.
- Implemented secure JWT authentication, Razorpay payment integration, and Cloudinary-based media management for a reliable, production-style user experience.

Trip — AI-Powered Travel Itinerary Generator

GitHub | Live

React.js, Node.js, Express.js, MongoDB, JWT, Google Gemini API

- Developed a full-stack MERN application that generates personalized travel itineraries from uploaded booking documents using a two-stage Google Gemini AI pipeline.
- Built a responsive React interface for document upload, itinerary visualization, processing-status tracking, and public itinerary sharing via unique tokens.
- Designed an asynchronous processing workflow with background AI generation and status polling, keeping the UI responsive during long-running API calls.
- Implemented JWT-based authentication, RESTful APIs, and MongoDB data models for managing users, uploaded documents, and itinerary records.
- Deployed the frontend on Vercel and backend on Render, configuring environment-based CORS policies and production-ready API communication.

ChatApp — Real-Time Messaging Platform

GitHub | Link

React.js, Node.js, Socket.IO, Redis, JWT

- Built a real-time chat application supporting one-to-one and group messaging with a responsive UI across devices.
- Integrated Socket.IO with Redis pub/sub for low-latency message delivery, online presence tracking, and typing indicators, with secure JWT authentication.

EDUCATION

Master of Computer Applications (MCA) — University of Mumbai

2023 – 2025 | CGPA: 8.15/10

Bachelor of Computer Applications (BCA) — YCMOU University

2020 – 2023 | CGPA: 6.95/10

CERTIFICATIONS & ACHIEVEMENTS

- Virtual Internship Program, Edunet Foundation
- MERN Stack Web Development, CodeHelp
- Data Structures and OOP with C++, Udemy
